CERTIFICATIONS

AWS Solutions Architect - Associate | Azure Administrator Associate | Professional Scrum Master (PSM 1)

PROFESSIONAL EXPERIENCE

Technical Consultant

2025 – Present

Pariveda Solutions, Inc. | Client: Tier-1 Midstream Natural Gas Pipeline Operator

Houston, TX

- **Full-Stack Development:** Shipped daily production code across Angular, FastAPI, containerized ELT pipeline, AWS infrastructure, and Redshift codebases, delivering full-stack features across a wide variety of client applications.
- **Database Architecture:** Architected a Flyway database migration framework across isolated AWS accounts, cutting deployment times by ~50% and enforcing strict enterprise security boundaries.
- **System Reliability Analysis:** Diagnosed critical ELT pipeline failure, presented a root-cause analysis and drafted a new decoupled re-architecture roadmap that was adopted by the business.
- **Domain Expertise:** Engineered automated SQL ingestions from complex legal tariff documents, translating pipeline regulatory rules into code.
- **Tech Stack Analysis:** Evaluated architectural trade-offs across AWS Lambda, ECS, MWAA, and Dagster, modeling compute, orchestration, and cost parameters to guide executive tech stack decisions.

Cloud Infrastructure Engineer

2023 – 2025

Brigham Young University Office of Information Technology

Provo UT

- **Enterprise Cloud Governance:** Co-managed a ~200 AWS account organization across 3 university campuses with a small team, utilizing Terraform to enforce core networking & security infrastructure, and IAM governance.
- **Platform Automation & POCs:** Designed a Proof of Concept AWS Control Tower + Terraform platform to automate account provisioning/decommissioning.
- **Cloud SME/Advisor:** Served as primary SME across 3 campuses, advising department teams on AWS architecture best practices, account onboarding, and organization-wide network troubleshooting.

Quality Assurance Engineer (Internship)

May 2023 – Aug 2023

The Church of Jesus Christ of Latter-day Saints

Riverton UT

- Partnered with product owners and analysts to refine business requirements and deployed Azure CI/CD testing pipelines, utilizing AWS Lambda, DynamoDB, and CloudFront.

Level 2 Computer Help Desk Technician

2021 – 2023

Brigham Young University Department of Physics and Astronomy

Provo UT

- Led a project team as scrum master, built API integrations from a local inventory system to a cloud database, and managed a network of 800+ endpoints.

EDUCATION

BS & MS of Information Systems Management

May 2025

Brigham Young University | Marriott School of Business

Provo, UT

- Minor in Computer Science | GPA: 3.87 (Major), 3.94 (Minor)

TECHNICAL SKILLS & INTERESTS

- Cloud and Infrastructure: AWS, Azure, Terraform, GitOps, CI/CD, Docker, Networking and Security
- Data and Software: SQL (Flyway, SQLAlchemy), Python, JavaScript (Angular), Redshift, Postgres
- Projects: Homelab (microservices, VPNs, Hypervisors), Terraform static site module, personal website
- Vietnamese Language (proficient)
